EXAMINER

GURSHMAN, GRIGORY

ART UNIT

PAPER NUMBER

2132

DATE MAILED: 08/07/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

# Office Action Summary

Application No.

09/415,578

Applicant(s)

GOMEZ ET AL.

Examiner

Grigory Gurshman

Art Unit

2132

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 08 October 1999.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 08 October 1999 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).  
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_
- 2) ☒ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) \_\_\_\_\_ 6) ☐ Other: \_\_\_\_\_

## DETAILED ACTION

### *Drawings*

1. The drawings are objected to because of the draftsman's objections (see PTO-948). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2, 3, 14 - 20, 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bessette (U.S. Patent No. 6,263,330 B1) in view of Angels (U.S. Patent No. 5,933,811)

4. Referring to the instant claims, Bessette discloses a method and apparatus for the management of data files (see abstract and Fig. 10). Bessette teaches that client work-station downloads a record along with the set of pointers, which link the client to the remotely stored files (see abstract).

5. Referring to the independent claim 1, the limitation "receiving, by the library system computer, user identification and password from the user computer" is met by work-station (client in Fig.10) logging onto a server (300 in Fig.10) using the user

Art Unit: 2132

identification and password (see column 10, lines 60-65). The limitation "comparing, by the library system computer, the received user identification and password with authorized user identifications and corresponding passwords stored in the library system to determine whether to grant access to the interactive library system" is met by a validation table component stored in the memory of the server. Validation table maps all the registered user IDs to the corresponding passwords. The table is used to validate clients logging on to the server, for security purposes (see column 10, lines 6-9 and lines 60-67). The limitation "if comparison results in grant of access, then receiving, by the library system computer, input from the user computer specifying type of information desired by the user " is met by a request from the client workstation (304 in Fig. 5) sent to the library system computer (Server 300 in Fig. 5). The limitation "receiving, by the library system computer, result of the search request from the content provider computer; and providing, by the library system computer, the result to the user computer" is met by the server (300 in Fig. 10) receiving the query result from the NDSMR database (content provider) and returning the NDSMRs (25 in Fig. 10 and 908 in Fig. 9) to workstation (client in Fig. 10). Referring to the limitation "establishing, by the library system computer, telecommunication link with content provider computer", Bessette shows that the server (library system computer) establishes the link to the NDSMR database. Bessette, however, does not teach establishing a telecommunication link with the content provider computer. Angeles discloses a system for delivering the customized advertisements within interactive communication system (see abstract and Fig 10 and 11). Angeles shows that advertisement provider computer (18 in Fig.10)

Art Unit: 2132

establishes the telecommunication link with content provider computer (14 in Fig. 10). Advertisement provider computer (i.e. library system computer) receives the content based on the consumer number code (i.e. identification information) and then provides the result content to the consumer computer (i.e. user computer) - see Fig 10 and 11. Therefore, at the time the invention was made, it would have been obvious to one of ordinary skill in the art to receive by the server of Besset an input from the user and establish the telecommunication link with the content provider computer as taught in Angels. One of ordinary skill in the art would have been motivated to receive by the server of Besset an input from the user and establish the telecommunication link with the content provider computer as taught in Angels for adding the advertisement information to the content and providing it to the user (see Angels abstract and Fig.10).

5. Referring to the independent claim 16, the limitation "a storage unit electrically coupled to the library computer to store user identifications and passwords" is met by the validation table which maps all the registered user IDs to the corresponding passwords (see Besset, column 10, lines 6-9 and lines 60-67). The limitation "the program comparing user identification and password received from the user computer with the user identifications and corresponding passwords stored in the second storage unit" is met by the validation functional block (see Besset, column 10, lines 57-64).

6. Referring to claim 2, 19, Besset teaches that a doctor (i.e. user of the work-station) can use the pointers in order to choose the type and the way the of displaying of the information (see column 7, lines 52-56), which meets the limitation "customizing user interface ... based on type of oinformation desired by the user".

Art Unit: 2132

7. Referring to claims 14 and 15, it is well known in the art to notify the user upon receiving the results of a search request by means of electronic communications. For example various data base applications use the e-mail alerts to the user.

8. Referring to claim 20, Angels teaches the use of a consumer number code (see 22 in Fig. 10), which meets the limitation "user account data".

9. Claims 4 -13, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bessette (U.S. Patent No. 6.263.330 B1) in view of Angels (U.S. Patent No. 5.933.811) and further in view of Usui (U.S. Patent No. 5.956.697).

10. Referring to the instant claims Bessette and Angels the library system computer receiving the search results from the content provider. Bessete and Angels, however do not teach determining the time amount of access, recording it and generating an account statement. Usui discloses a timer-based fee-charging system for internet (see abstract and Fig.1). Usui teaches calculating access charges according to the amount of access time used by each client (i.e. user) – see column 3, lines 1-6. Therefore, at the time the invention was made, it would have been obvious to one of ordinary skill in the art to have the library system computer receiving the search results from the content provider of Bessette and Angels and calculate access charges (i.e. account statement) according to the amount of time used by each user as taught in Usui. One of ordinary skill in the art would have been motivated to have the library system computer receiving the search results from the content provider and calculate access charges (i.e. account

Art Unit: 2132

statement) according to the amount of time used by each user as taught in Usui for charging the user for the access time (see Usui, abstract).

**Conclusion**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Grigory Gurshman whose telephone number is (703)306-2900. The examiner can normally be reached on 9 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on (703) 305-1830. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 746-7239 for regular communications and (703) 746-7238 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the TC 2100 receptionist whose telephone number is (703) 305-3900.
